SAFETY INFORMATION

Storage furniture

Product group	Applies to products including chests of drawers, wardrobes, bookcases, bedside cabinets, TV units, drawer pedestals and tall cabinets.

This document provides general information on the safe assembly and use of products in the specified group. Use it together with the assembly instructions for the particular model, the markings on the product and packaging, and the product-specific information on permitted loads, dimensions and fixing methods.

IMPORTANT: If the instructions for a particular model contain more specific requirements, restrictions or warnings, those take precedence over this general information.

Assembly and stability

- Assembly must be carried out by an adult in accordance with the instructions. Place the furniture on a stable, level surface and level it if its design allows.
- Where the instructions or product design require wall fixing, use an anti-tip fixing. Select the wall fixing to suit the type of wall.
- Before drilling, make sure there are no electrical cables, water pipes or other concealed services at the fixing point.

Safe use

- Do not climb on shelves, drawers, doors or other parts of the furniture. Children must not use it as a ladder or a place to play.
- Do not overload shelves, drawers or tops. Follow the load limits specified for the particular model.
- Place heavier items as low as possible and distribute them evenly. Do not open several loaded drawers at once if doing so could affect stability.
- Open and close doors and drawers carefully to reduce the risk of trapping fingers.

TV units and equipment

- Place electronic equipment only in positions intended by the furniture design and do not exceed the permitted load.
- Do not obstruct equipment ventilation openings. Route cables so that they are not under tension and do not create a trip hazard or a risk of pulling equipment down.

Inspection and maintenance

- Periodically check that joints are tight and inspect wall fixings, hinges, runners and other fittings.
- If stability is lost or the structure or fixings are damaged, stop using the product until the fault has been corrected.

If a safety concern arises

If the product is damaged or is suspected of presenting a hazard, stop using it and contact the manufacturer. Do not make structural modifications yourself.

Manufacturer details

Manufacturer	Kocot Kids Magdalena Kocot
Trading brands	Kocot Kids / Kocot Meble
Address	ul. Bolesława Chrobrego 17, 45-580 Opole
E-mail	info@kocotkids.com
Tax ID (NIP) / REGON	7542841805 / 161370108
